

NOVAE EPISTULAE

How small and narrow is our world

Dear friend and supporter,

Nowadays world is shrinking and not spreading towards new frontiers.

Social media and their guru are intent on taking control of people and manipulate them. In this way the illusion that the XXI century has been a great period of globalization for all (opportunities, resources, welfare, markets, common social values etc..) proves to be a big lie.

All those promises of solidarity, responsibility, equal opportunities, talents have only been good words written on papers of the “major world powers”. Plutocrats are sometimes generous donating thanks to their philanthropic foundations, but it is not the same when the point is to reduce their earnings with special interests and their international speculations.

Anyway, something is changing.

Donate and support us now !

The mask is creaking, the painting of the temple is whitening and is showing a danger for countries, cultures and populations, churches and religions . More than one country has already done something against the speculator philanthropist George Soros; Israel, Hungary and many other countries are raising their voices in protest against the person who with his philanthropic activity is working only for his own interests, overturning the democracy in many countries, the wishes of the people, the republican order only in order to obtain new monopolies. Macedonia and its people are paying the price.

In the US, after Trump victory, it seems Soros started discrediting the new US administration. He not only financially supports street protests, the election of judges and district prosecutors, but also, thanks to his organizations, he controls news, included “fake news”, choosing which lie is true or not.

It doesn't sound strange that in these days “USA-Russia connection” investigations have been published and we find Hilary and Bill Clinton's names but not Trump.

Many countries are rebelling against all of it, million of people sign petitions and march through the streets in the name of human rights defense, life, family freedom of education and freedom of religion.

Nowadays freedom of information is in danger

Donate and support us now !
