## Right to life becomes right to death

Dear friend and supporter,

Periodically, the UN Human Rights Committee prepares a General Comment. This is done to update the interpretation of some articles of the conventions in force.

This year, it's the guidelines interpreting the Right to Life - Article 6 in the International Covenant on Civil and Political rights (signed in 1966 and entered into force in 1976).

Article 6 affirms that "Every human being has the inherent right to life. This right shall be protected by law. No one shall be arbitrarily deprived of his life." Subsequent sections of Article 6 detail the death sentence, genocide, the right to seek amnesty and pardon, and crimes committed by persons under eighteen.

The draft Comment currently under review opens the door to new interpretations that change the original spirit of Article 6.

It contemplates imposing on every State the legalisation of abortion, of assisted suicide and of euthanasia, in the very name of the right to life!

Yes, you did not misread that. Article 6 defends and support life, but UN appointed experts and some countries would like to convince us that we must also support abortion and euthanasia.

This is the latest attempt by the UN to destroy the cornerstone of human rights and covenants that defend the life of the unborn.

Lobbies of the 'culture or Death' are making every effort to win this decisive victory in

Geneva. Claiming that supporting the sanctity of life must entail supporting abortion and euthanasia (both resulting in death) demonstrates the determination of those behind the comment (including abortion and euthanasia lobbyists) to confuse and dupe UN representatives and their governments and peoples.
