## Freedom or right to kill your own child?

Dear friend, supporter,

In these last months, pro-abortion proposals strongly gain new ground in different countries in the Western world.

Last 28th September was the International Safe Abortion Day, as abortion could be safe for who is involved. For sure it is not for the weakest part in it, the baby who is killed.

Against all the moral and scientific evidences, different pro-abortion organizations in the world and some “UN experts” would like to impose changes of laws in some countries and they would like abortion for all and with no limits.

With his declarations Sessions raised doubts against people who decide “what is offensive and what is acceptable”.

“Freedom of speech doesn’t exist to protect what we all want to agree. It exists to protect what we don’t want to hear.”

Yes, they want to give the permission to the woman (the future mother) to decide if and when to have abortion up to the last week of pregnancy, up to 9th months, the very last moment before the birth of her child.

This unprecedented legal barbarity will generate severe moral damage. Forced and unlimited abortions were carried out only during last century totalitarian regimes to punish people considered enemies of the state and threats to the nation.

Now they want to exterminate the entire human race and at the same time engineer the future of whole continents.

It is no coincidence that many of the promoters of these organizations have been financially supported (G. Soros) by the same philanthropists who support the continued uncontrolled influx of migrants towards US and Europe.

An ethnic, religious, culturale and racial cleansing is to be inflicted on the western world that must be replaced with masses of desperate migrants. The objective is the total demographic and cultural substitution in of entire continents.

They wish to transform the murder of a baby, innocent and vulnerable, in a well accepted, non-punishable right.

Help us today to challange thise new dangerous hegemony!

Togheter , we can and must awaken the public conscience to prevent the killing of babies before birth becoming a right. Killing babies is a crime in all countries and cultures because of its unacceptable barbarity and the human dignity of every person.

Respecting and supporting human rights is a commitment for all, help us!

Let help us one another since today, Thanks.
