Countries around the world where there are more marriages and more family stability, thanks to policies for the benefit of families too are more respectful of human dignity.

**Marriage** exists to bring a man and a woman together as husband and wife to be father and mother to any children their union produces.

**Marriage** is based on the truth that men and women are complementary, the

biological fact that reproduction depends on a man and a woman, and the reality that children need both a mother and a father.

**Marriage** is society's least restrictive means of ensuring the well-being of children.
