

NOVAE EPISTULAE

**Everyone deserves respect for
human dignity**

Dear friends,

A person, every person thanks to the diversity is extraordinary, is unique and unrepeatable from conception to natural death; in this way a person can make a mark in the history of human life.

Asserting the importance of human life and not supporting the respect for life is

seriously contradictory and unforgivable. A “vulnus”, a sin that deprives humanity of the importance of the unique presence in the world that every person has.

We are working on the project of a **Global Index on Human Dignity**; it has the purpose of evaluating this type of data: respect for human life from conception to natural health. Is human life supported? Or abortion? Is care granted in every moment of life or is euthanasia the choice? Is birth rate policy promoted? Or does not the state help mums during maternity?

SUPPORT AND DONATE

Internationally pro-abortion policies are more and more supported; international organizations that are supposed to promote human dignity and life as the most important human right prefer to support abortion and euthanasia.

The Commissioner for human rights at the Council of Europe (organization of 47 European and extra European countries) has recently explicitly supported abortion as a right for all, forgetting that **abortion exists when we decide to kill a baby**.

Interamerican Court of Human Rights keeps promoting abortion and threatening many countries in Latin America with a violation of their autonomy.

Millions of abortions, millions of victims of abortion, don't they have the right to be born?

International lobbies push for the approval of pro-abortion laws by new countries; Ireland, El Salvador, Bolivia, Poland and Malta are subject to uncivil pressure.

Thanks to our **Global Index on Human Dignity** we'll be able to expose who violates human life.

SUPPORT AND DONATE

Euthanasia is more and more present in many Western countries and is becoming eugenics against Down children, elderly with mental diseases, depressed young people. In many countries where euthanasia is admitted it is demonstrated that doctors tragically **kill the sick** that have no more importance. Patient are considered useless and dangerous objects.

Why isn't health care right respected? Where is human dignity?

Human dignity must be respected, it can not be abolished or challenged!

The **Global index on Human Dignity** will discover countries health policies and will show differences between who take care of citizens and who prefer to support death.
