

Dearest friends,

thanks to your help, our concrete commitment to the support of life from birth to natural death continues with ever greater vigor and with great results.

I am particularly happy to inform you that one of our projects in Congo for the concrete defense of Life has had an extraordinary result.

At the request of Dr. Luca Attanasio, the Italian Ambassador in the Democratic Republic of Congo, we have worked to find a drug that cannot be found in Congo and that is hard to get even in Europe.

A young Congolese girl, Kabuku M., admitted to a hospital in Kinshasa due to a serious disease is dying, and local doctors have no chance of finding the necessary supply for her therapy.

Our global chain of solidarity has then began and just a few days ago, thanks to the collaboration of the Korean pharmaceutical multinational manufacturer of the drug, we have been able to obtain the provision needed for the treatment of the young woman.

In a few days the drug, already available, will leave for Kinshasa and the life-saving therapy will begin. We would like to deeply thank Dr. WonSik Yoo, president of the pharmaceutical company CELLTRION HEALTCARE, the Italian manager Dr. Di Biasio and all those who have collaborated in this project.

We will keep you informed about the course of the disease and the recovery of Kabuku.

**Help young Congolese girls affected by serious disease**

**GIVE NOW by Credit Card or Paypal**

We have kept this operation confidential until now in order not to generate unrealistic expectations in the woman as the outcome was far from certain, but with the help of God and Providence the result has been achieved. As part of our projects for Congo we have also started a fundraising to support the ambulance for the street children of Don Maurizio Canclini. He brings relief to the children of Kinshasa, the poorest of the poor, and his project is obtaining extraordinary results, mainly thanks to all your help and donations.

We invite you to watch the short video that you can find on our Facebook page and to donate generously, according to your possibilities.

With your donations you will support one of the most effective and pragmatic projects to aid life that are currently taking place in Africa. You will soon find the complete project on our website.

**LET'S BE BRAVE MY FRIENDS, AND SHOW OUR REAL SOLIDARITY IN SUPPORTING LIFE!**

**I thank you one by one for what you have done and will do for our causes.**

Thank you for your donation and your prayers!

Emanuele Gianmaria Fusi

President of Foundation Novae Terrae
