

Dear friends,

Novae Terrae has always fought for freedom of religion; it is not only a good principle or a fundamental human right.

In the past weeks, the images of police in Churches during Eucharistic celebrations have disappointed the all world and us .

We have considered what to do in order to avoid these situations after the reopening.

Thanks to your donations, Novae Terrae Foundation has distributed thousands of face masks in different city parishes in Lombardy. We hope you will keep supporting us.

On May 18th liturgical celebrations were reopened to people, and on May 24 Sunday masses did. Priests, volunteers and people are supposed to wear face masks during the celebrations.

Freedom of religion is a concrete right that bureaucracy or lack of medical devices cannot limit or prohibit.

Our donation want to help parishes following the rules established in Government and Italian Bishops Conference's decision.

They want to ensure people, priests and volunteers' security during celebrations. We made a small but effective thing; in the coming weeks, we want to do more thanks to your help and donations.

We have so far distributed thousands of face masks to 10 parishes in Como and Varese province.

Your help is essential; together we can make freedom of religion tangible.

Freedom of religion is not only a good human right on UN declaration; we can make it tangible for everyone!

We want and we can do more with your generous donation and support.
