

Dear friends,

In the last weeks, our President Mr.Fusi has already thanked you for the support we receive for our help campaign.

It tries to fight the serious consequences of this terrible scourge of Covid-19 for poor people and vulnerable families.

Thanks to your donations, we managed to deliver thousands of respiratory protection masks (FFP2) to health professionals, volunteers, families and people at "Casa di Marta" in Saronno (VA), Lombardy.

This is an important charitable structure between three different provinces: Milan, Varese and Monza.

In it, different organizations and hundreds of volunteers listen and meet persons in need and families in situations of difficulty.

They provide hot meals, clothes, household linen, psychologic support, classrooms for self-study, educational support to boys and girls who need it, teaching materials and a good library service.

Novae Terrae Foundation has decided to start from here to give a real help for life and family.

This is a way to meet the needs registered on the territory in Lombardy during these months with Covid-19.

"At Casa di Marta we promote charitable services that allow people, culture, languages and different ways of life to meet together. We are sure that this is an important point that enriches everyone; we think culture as a meeting point that can create positive discussion, debate and beauty."

This is not the only thing that FNT did.

Thankfully, we know we will have your support in the coming weeks, so we have donated to “Casa di Marta” the sanitization and disinfection of the entire building where volunteers and organizations do their job with people and where they are hosted.

We have provided a high-level sanitization that use surface swabs to confirm the total efficacy of it. This action allows a safe resumption of the activities in the structure that is a reference point for families and people in need.

These two initiatives are fully in line with Novae Terrae Foundation’s values and aim; they are a concrete practical support for poor families and people who live in this serious emergency period.

We want and we can do more with your generous donation and support.
